Abstract

Replace this text with a self-contained abstract that states the purpose, methods, principal results, and main conclusion of the work. Avoid citations, undefined abbreviations, equations, and editorial information such as received or accepted dates.

Keywords

keyword one; keyword two; keyword
three; keyword four

1 Introduction

Explain the research context, the specific problem addressed, the relevant literature, and the contribution of the article. Cite references using `\cite{reference-key}`.

2 Materials and Methods

Describe the study design, data sources, accounting framework, assumptions, analytical methods, and reproducibility information in sufficient detail.

$$y_t = \alpha + \beta x_t + \varepsilon_t. \quad (1)$$

Use the `align` environment for multiline equations. Do not use `eqnarray`.

3 Results and Discussion

Present the results clearly and discuss their interpretation, limitations, relationship to prior work, and policy or management significance.

*Corresponding author.

Email address: first.author@example.edu

4 Conclusions

State the main conclusions without repeating the abstract. Identify important limitations and, where appropriate, directions for future work.

Declarations

Funding. State the funding source and grant number, or write “No external funding.”

Conflicts of Interest. Declare any competing interests, or write “The authors declare no conflicts of interest.”

Data Availability. State where the data can be accessed and under what conditions, or explain why data sharing is not applicable.

Author Contributions. Briefly state each author’s contribution to the work.

Acknowledgments. Optional. Acknowledge non-author contributions that do not meet authorship criteria.
